

Index to Volume 274

- Ackermann K, *see* Pyerin W *et al*
- Ackermann K, Neidhart T, Gerber J, Waxmann A, Pyerin W: The catalytic subunit α' gene of human protein kinase CK2 (CSNK2A2): Genomic organization, promoter identification and determination of Ets1 as a key regulator 91–101
- Ahmad KA, *see* Wang G *et al*
- Ahmad KA, *see* Wang G *et al*
- Ahmed K, *see* Wang G *et al*
- Ahmed K, *see* Wang G *et al*
- Allada R, Meissner R-A: Casein kinase 2, circadian clocks, and the flight from mutagenic light 141–149
- Allende JE, *see* Hermosilla GH *et al*
- Allende-Vega N, Dias S, Milne D, Meek D: Phosphorylation of the acidic domain of Mdm2 by protein kinase CK2 85–90
- Bandhakavi S, *see* Poole A *et al*
- Barz T, *see* Pyerin W *et al*
- Bidwai AP, *see* Karandikar UC *et al*
- Bishop CP, *see* Karandikar UC *et al*
- Blond O, Jensen HH, Buchou T, Cochet C, Issinger O-G, Boldyreff B: Knocking out the regulatory beta subunit of protein kinase CK2 in mice: Gene dosage effects in ES cells and embryos 31–37
- Boldyreff B, *see* Blond O *et al*
- Boldyreff B, *see* Rasmussen T *et al*
- Buchou T, *see* Blond O *et al*
- Cochet C, *see* Blond O *et al*
- Cochet C, *see* Theis-Febvre N *et al*
- Cozza G, *see* Pagano MA *et al*
- Currier N, *see* Seldin DC *et al*
- Dias S, *see* Allende-Vega N *et al*
- Dominguez I, *see* Seldin DC *et al*
- Dominguez I, Mizuno J, Wu H, Imbrie GA, Symes K, Seldin DC: A role for CK2 α/β in *Xenopus* early embryonic development 125–131
- Duarri A, *see* Llorens F *et al*
- Farago M, *see* Seldin DC *et al*
- Filhol O, *see* Theis-Febvre N *et al*
- Frascella P, *see* Sarno S *et al*
- Götz C, Kartarius S, Schetting S, Montenarh M: Immunologically defined subclasses of the protein kinase CK2 β -subunit in prostate carcinoma cell lines 181–187
- Gerber J, *see* Ackermann K *et al*
- Gilmour SK, *see* Lawson K *et al*
- Glover CVC, *see* Poole A *et al*
- Grunwald D, *see* Theis-Febvre N *et al*
- Hanna DE, *see* Poole A *et al*
- Hermosilla GH, Tapia JC, Allende JE: Minimal CK2 activity required for yeast growth 39–46
- Homma MK, Homma Y: Regulatory role of CK2 during the progression of cell cycle 47–52
- Homma Y, *see* Homma MK *et al*
- Imbrie GA, *see* Dominguez I *et al*
- Issinger O-G, *see* Blond O *et al*
- Issinger O-G, *see* Niefind K *et al*
- Issinger O-G, *see* Rasmussen T *et al*
- Itarte E, *see* Llorens F *et al*
- Jensen HH, *see* Blond O *et al*
- Jensen HH, *see* Rasmussen T *et al*
- Karandikar UC, Shaffer J, Bishop CP, Bidwai AP: *Drosophila* CK2 phosphorylates Deadpan, a member of the HES family of basic-helix-loop-helix (bHLH) repressors 133–139

- Kartarius S, *see* Götz C *et al*
- Landesman-Bollag E, *see* Seldin DC *et al*
- Larentowicz L, *see* Lawson K *et al*
- Laudet B, *see* Theis-Febvre N *et al*
- Laury-Kleintop L, *see* Lawson K *et al*
- Lawson K, Larentowicz L, Laury-Kleintop L, Gilmour SK: B23 is a downstream target of polyamine-modulated CK2 103-114
- Litchfield DW, *see* Olsten MEK *et al*
- Llorens F, Sarno S, Sarró E, Duarri A, Roher N, Meggio F, Plana M, Pinna LA, Itarte E: Cross talk between protein kinase CK2 and eukaryotic translation initiation factor eIF2 β subunit 53-61
- Lou D, *see* Seldin DC *et al*
- Lucchini V, *see* Sarno S *et al*
- Maira GD, *see* Sarno S *et al*
- Martel V, *see* Theis-Febvre N *et al*
- Mazzorana M, *see* Sarno S *et al*
- McCann RO, *see* Poole A *et al*
- Meek D, *see* Allende-Vega N *et al*
- Meggio F, *see* Llorens F *et al*
- Meggio F, *see* Pagano MA *et al*
- Meggio F, *see* Sarno S *et al*
- Meissner R-A, *see* Allada R *et al*
- Milne D, *see* Allende-Vega N *et al*
- Miyata Y, Nishida E: CK2 binds, phosphorylates, and regulates its pivotal substrate Cdc37, an Hsp90-cochaperone 171-179
- Mizuno J, *see* Dominguez I *et al*
- Montenarh M, *see* Götz C *et al*
- Neidhart T, *see* Ackermann K *et al*
- Niefind K, Issinger O-G: Primary and secondary interactions between CK2 α and CK2 β lead to ring-like structures in the crystals of the CK2 holoenzyme 3-14
- Niefind K, *see* Rasmussen T *et al*
- Nishida E, *see* Miyata Y *et al*
- Olsten MEK, Weber JE, Litchfield DW: CK2 interacting proteins: Emerging paradigms for CK2 regulation? 115-124
- Pagano MA, *see* Sarno S *et al*
- Pagano MA, Sarno S, Poletto G, Cozza G, Pinna LA, Meggio F: Autophosphorylation at the regulatory β subunit reflects the supramolecular organization of protein kinase CK2 23-29
- Pinna LA, *see* Llorens F *et al*
- Pinna LA, *see* Pagano MA *et al*
- Pinna LA, *see* Sarno S *et al*
- Plana M, *see* Llorens F *et al*
- Poletto G, *see* Pagano MA *et al*
- Poole A, Poore T, Bandhakavi S, McCann RO, Hanna DE, Glover CVC: A global view of CK2 function and regulation 163-170
- Poore T, *see* Poole A *et al*
- Pyerin W, *see* Ackermann K *et al*
- Pyerin W, Barz T, Ackermann K: Protein kinase CK2 in gene control at cell cycle entry 189-200
- Rasmussen T, Skjoth IHE, Jensen HH, Niefind K, Boldyreff B, Issinger O-G: Biochemical characterization of the recombinant human *Drosophila* homologues *Timekeeper* and *Andante* involved in the *Drosophila* circadian oscillator 151-161
- Roher N, *see* Llorens F *et al*
- Ruzzene M, *see* Sarno S *et al*
- Sarno S, *see* Llorens F *et al*
- Sarno S, *see* Pagano MA *et al*
- Sarno S, Ruzzene M, Frascella P, Pagano MA, Meggio F, Zambon A, Mazzorana M, Maira GD, Lucchini V, Pinna LA: Development and exploitation of CK2 inhibitors 69-76
- Sarró E, *see* Llorens F *et al*
- Schetting S, *see* Götz C *et al*
- Seldin DC, *see* Dominguez I *et al*
- Seldin DC, Landesman-Bollag E, Farago M, Currier N, Lou D, Dominguez I: CK2 as a positive regulator of Wnt signalling and tumorigenesis 63-67
- Shaffer J, *see* Karandikar UC *et al*
- Skjoth IHE, *see* Rasmussen T *et al*

- Slaton JW, *see* Wang G *et al*
- Souchier C, *see* Theis-Febvre N *et al*
- Symes K, *see* Dominguez I *et al*
- Tapia JC, *see* Hermosilla GH *et al*
- Theis-Febvre N, Martel V, Laudet B, Souchier C, Grunwald D, Cochet C, Filhol O: Highlighting protein kinase CK2 movement in living cells 15-22
- Unger G, *see* Wang G *et al*
- Wang G, Ahmad KA, Ahmed K: Modulation of death receptor-mediated apoptosis by CK2 201-205
- Wang G, Unger G, Ahmad KA, Slaton JW, Ahmed K: Downregulation of CK2 induces apoptosis in cancer cells - A potential approach to cancer therapy 77-84
- Waxmann A, *see* Ackermann K *et al*
- Weber JE, *see* Olsten MEK *et al*
- Wu H, *see* Dominguez I *et al*
- Zambon A, *see* Sarno S *et al*
